

TOP TEN

Reasons to build an A&S Home

1. HISTORY

A&S Homes was founded in 1976 by brothers Tony & Sam Spezzano. Today, we employ over 400 staff and trade professionals and are known as the cornerstone of Manitoba's new home construction industry. Our head office is located at 900 Lorimer Boulevard in Winnipeg.

2. PLANS

A&S Homes has our own exclusive architectural team working within the facilities to provide efficient plan creations. You'll have the opportunity to sit down with your agent and review the plans to make sure they're what you envisioned.

3. DESIGN CENTRE

A&S Homes has an in house Design Centre with a full time professional interior design team. Your new home purchase includes a one-on-one session where you'll sit down with one of our talented interior designers to plan the style of your new home from the ground up. Everything from exterior accents to interior touches are yours to select at this phase in our process – with flexibility to review your choices and make alterations.

4. VALUE

Our standard specifications are the best in the industry when comparing dollar for value. Compare "Apples to Apples" (see back).

5. MODELS

We have hundreds of models in our portfolio, but we're always working on our next model to adjust for changing times. Of course, all A&S Homes are customizable to fit your needs.

6. ENVIRONMENTAL IMPACT & ENERGY EFFICIENCY

A&S Homes leads Manitoba's new home construction sector in building energy-efficient, environmentally-sustainable homes. All of our models are more energy-efficient thanks to higher insulation levels, full-height basement insulation, foundation damp-proofing or water-proofing, R-glazed windows with Low-E argon, tighter construction, and advances in mechanical and electrical systems – working together to save you money on heating and cooling bills.

7. MODERN AMENITIES

A&S Homes' models feature lots of natural light, high ceilings, custom cabinetry, plenty of closet space, large garages, and extra space you can tailor to your needs whether for a home office, playroom, or home theatre centre. Open floor plans for entertaining, spacious kitchens for celebrations, and luxurious bathrooms to relax in are just some of the reasons why an A&S Home feels like YOUR home.

8. LESS MAINTENANCE WARRANTY

Our new innovations in homebuilding means your home is built to the latest standards with quality materials and advanced building technology. Additionally, our new homes are covered by the New Home Warranty Program of Manitoba. This means that your home is covered for any material or workmanship defects during the first year after you move in, and for many major structural issues that arise in the first five years. To learn more about A&S Homes' warranty and maintenance services, talk to your A&S Homes sales representative.

9. AREAS

We build our homes in desirable communities, primarily in Winnipeg and the surrounding areas. A&S Homes is an active builder in Bonavista, Bridgwater Trails, Canterbury Crossing, Devonshire Park, Highland Pointe, Meadowlands, Parkview Pointe, Prairie Pointe, Summerlea and Tourond Creek. A&S Homes can build on any lot you already own.

10. TEAM

A&S Homes' quality has five dimensions: process, materials, workmanship, service, and people. You'll experience all five facets of A&S Homes' quality as you work with us to build your home – and live in that home for years to come.

QUALITY COMES STANDARD

Discover how we build quality into every home.
