

Your Fall Home Maintenance Checklist

Follow these easy maintenance tips to make sure your A&S home is ready for the new season.

YOU CAN USE THIS AS A CHECKLIST TO ENSURE EVERY PART OF YOUR HOME IS PREPPED FOR THE COOLER MONTHS:

Remove exterior sump pump hose and hoses from exterior faucets at temperatures below 0°C.

Check downspouts and make sure that they are pointing away from your house.

Wash windows and doors, clean weep holes, and lubricate tracks.

Prepare your heating system: run early in the fall to test the furnace.

Adjust your registers and make sure that drapes and furniture are away from all air vents.

Remember to change or clean the filter of your furnace monthly.

Clean the filters of your HRV unit at least once every two months: vacuum them first, and then wash them with mild soap and water.

Set your HRV between 30-50% as needed.

Bonus Tips

Inspect exterior caulking and touch up as needed.

Look for the settling of backfill soil, check your foundation and concrete slab, and add soil where necessary to maintain positive drainage.

Clean off exterior deck and put all patio furniture away.

Cover outdoor plants to protect them from frost.

DON'T FORGET!

Proper fireplace practices will help you keep your home and family safe. Review your fireplace manual before use.

SENDING WARM WISHES!

By following these simple tips, you and your home will be ready for a seamless transition into the season of pumpkin spice and everything nice! Enjoy.
